

Range of Motion Project

Mobility for All

2024 IMPACT REPORT

A Beast of a Year

It's a crisp, clear day on a 14,000-foot mountain. A drone buzzes overhead, capturing every triumphant step. Patients who took their first steps just one day earlier now ascend bravely, on foot or horseback, each fueled by determination. This was ROMP with MrBeast, who brought his signature energy and gifted 100 prostheses, sharing our mission with millions.

2024 was extraordinary. With your support, we surpassed our goal of 525 limbs and delivered a record 691. We marked 10 years of Climbing for ROMP, with teams on Ecuador's three tallest peaks, celebrating mobility and empowerment.

We expanded care to the Amazon and Belize, launched key partnerships, and welcomed student residents from Universidad Don Bosco. Corporate allies like Hotel Vista Quince and Vitality stood beside us in Guatemala and Ecuador.

As we near our 20th anniversary, we're preparing for the next chapter by growing, evolving, and facing the reality that need still outpaces our resources. Our waiting list grows.

To our team and patients, thank you for your courage and dedication. To you, our supporters, every step forward is yours. In a world divided, may we lift one another with compassion, courage, and the unshakable belief in human dignity.

David Krupa
Co-founder and Executive Director

Jimmy Donaldson (MrBeast) and David Krupa after climbing with ROMP patients in Ecuador.

We envision
a world where
every person
with limb loss
has mobility.

We'd like to thank our amazing staff and volunteers for taking the beautiful photos found in this report.

Mission Moment

Amid nationwide blackouts, our Ecuador team set out on an unforgettable journey to the northern Amazon. Traveling over 10 hours by car and motorized canoe, they reached the remote province of Sucumbíos, to provide prosthetic limbs and to strengthen community partnerships. Welcomed by local leaders, they even crossed the river into Colombia to build cross-border referral networks. This mission marks a bold expansion of ROMP's reach into the Amazon, where mobility is now one step closer for those who need it most.

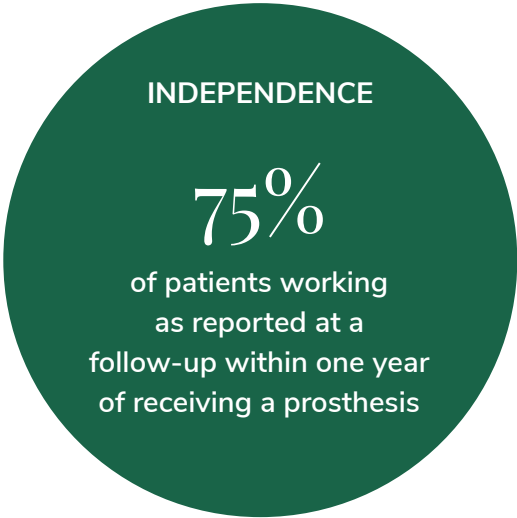

The Impact

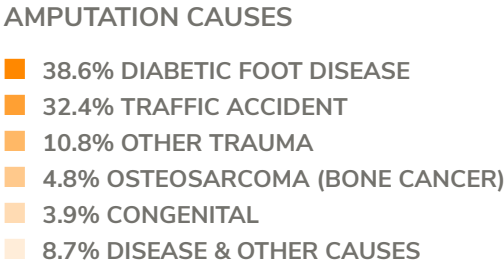

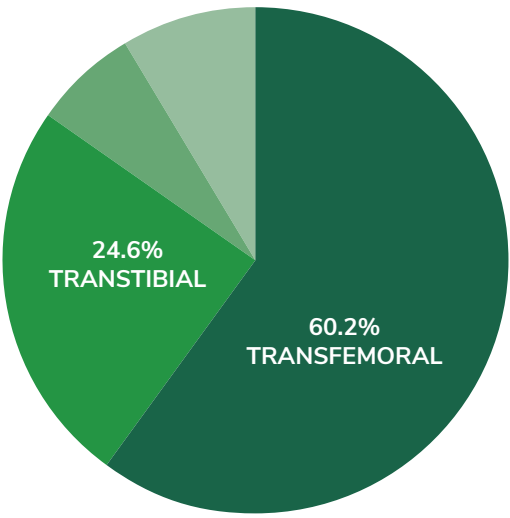

ROMP’s mission is to ensure access to **high-quality** prosthetic care for **underserved** people, **improving their mobility and independence.**

In addition to these four indicators, ROMP is measuring and evaluating patient outcome data in a wide variety of areas including mental health, general health, and social integration in order to deliver impactful services to all.

Who We Serve

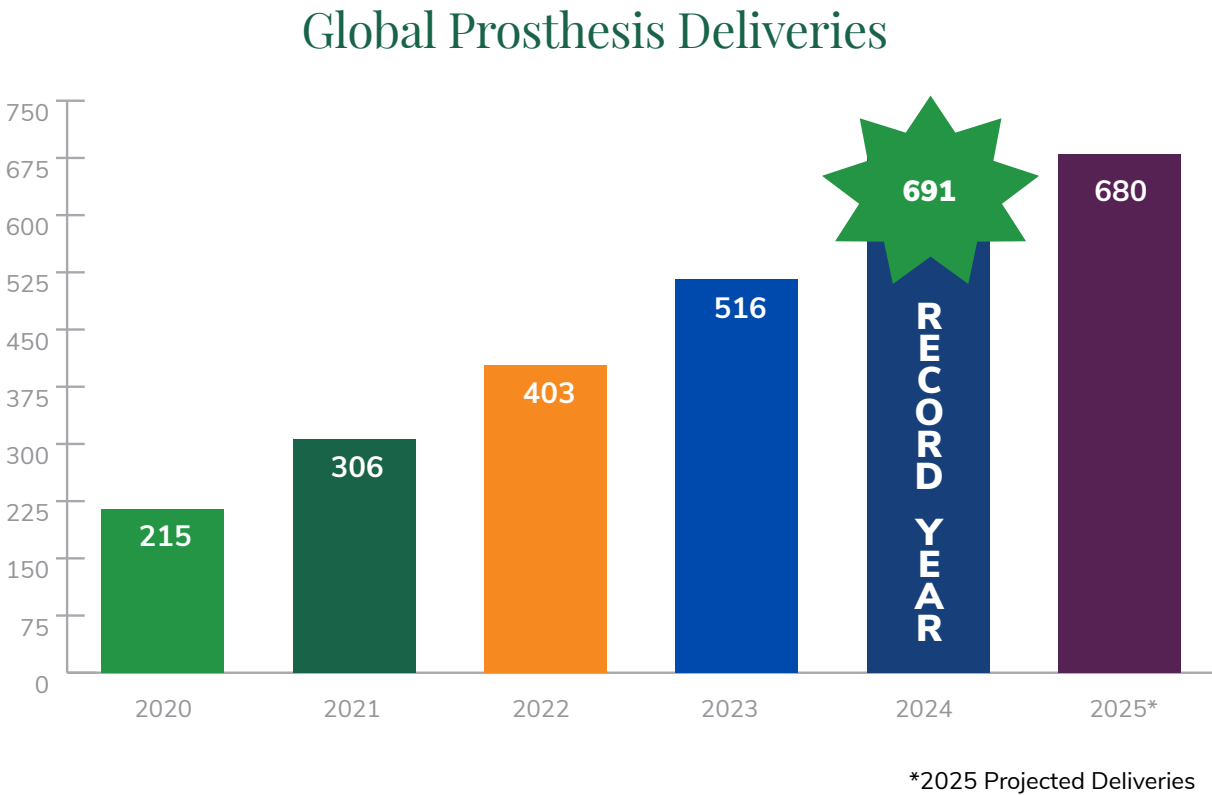

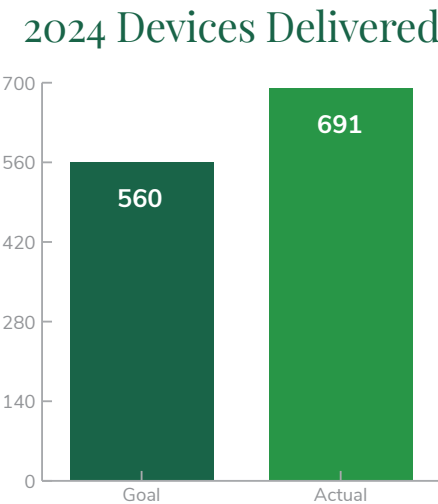

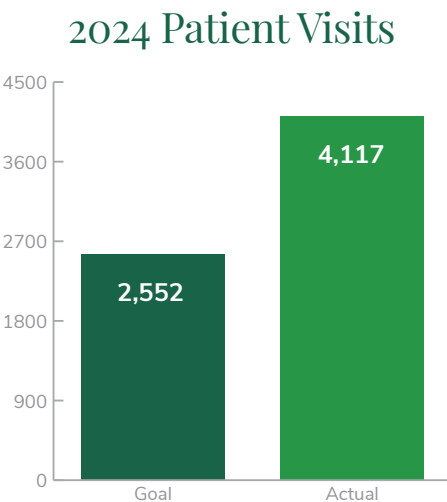

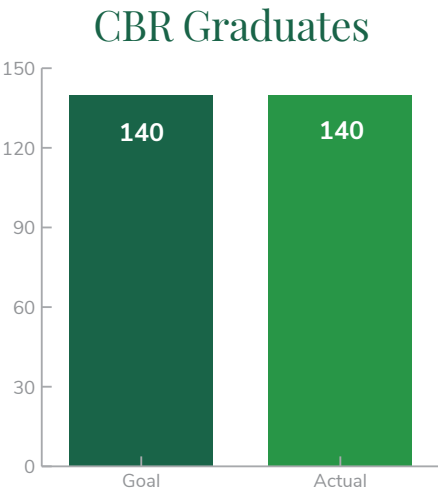

*World Bank [Poverty and Equity Briefs](#)

The Work

ROMP board, staff, patients, volunteers, and donors did a massive amount of work in 2024. In addition to the illustrated outputs, other work milestones include:

- **Launched MoviliApp** to guide and document Community-Based Rehabilitation (CBR) home visits in real time.
- **Maintained full clinical operations in Ecuador during nationwide blackouts** by adapting clinic infrastructure and powering workshops with a generator.
- **Conducted nine mobile clinics across remote areas of Guatemala and Ecuador**, including the Amazon basin and highland regions.
- **Partnered with six local Ecuadorian governments** across the Coastal, Highland, and Amazon regions to expand community-based service delivery.
- **Delivered 100+ mental health sessions** through group and individual therapy as part of ROMP’s wraparound care model.
- **Constructed a new workshop wing in Ecuador**, adding dedicated spaces for lamination, assembly, and innovation.
- **Trained 19 physical therapy students** in partnership with Guatemalan universities to build the next generation of clinical talent.
- **Launched a randomized-controlled trial** to measure the clinical and social impact of the CBR program in Guatemala.
- **Distributed 39 water filters** to patients in remote areas without access to clean drinking water.

Mission Moment

Nurban Agustín, 35, is a ROMP patient and an exceptional muralist. After losing his leg below the knee in an accident, one of the first murals he painted was at the ROMP Clinic. At ROMP, Nurban not only found mobility, but also the opportunity to reconnect with his talent. ROMP offers more than prosthetic care, but a range of services that allow patients to fully rehabilitate and reintegrate into society in the best possible way, providing them with human dignity, discovering their talents, and empowering them to reach the next level.

PATIENT VISITS

Patient Spotlight: Emilio

Meet Emilio, a bright and resilient two-year-old born with a congenital limb difference. Emilio is a left transtibial amputee who took his very first steps with a ROMP prosthesis at our clinic in Guatemala. His journey is just beginning, but already, he is walking, playing, and living a healthy and joyful life thanks to the care and support he received through ROMP.

2024 Highlights

- **Launched New Mobile Clinics** in San Marcos and Petén. Extended access to prosthetic care across the highlands, central, and northern regions of Guatemala, and even into southern Belize. In total, 50 prostheses were delivered through mobile clinics in 2024.
- **Explored Regional Expansion** by conducting mobile clinic visits in partnership with Rotary Club Corozal in Belize.
- **Secured Strategic Local Funding** from The Family Coppola Hideaways and Hotel Vista Quince.
- **Grew the ROMP Guatemala Team** with three new permanent team members and three temporary staff to strengthen our production capacity. Additionally, contracted specialists in community management and public relations to elevate local engagement.
- **Launched “Mobility for All” Campaign** Partnered with Hotel Vista Quince to host a year-end event that raised funds and visibility for ROMP Guatemala. The campaign was featured in three television segments and 13 news articles, generating meaningful momentum for our mission.

Mobility Beyond the Prosthesis

At ROMP, we know the prosthesis is only one piece of the puzzle. Our Community-Based Rehabilitation (CBR) Program in Guatemala provides wraparound care for people with limb loss; before and after receiving prosthesis. Each patient receives support through personalized home visits, clinical follow-up, psychosocial care, peer mentorship, and community-based resources. The result is a smarter, more human-centered model of care, one that ensures patients don't just walk again, but truly move forward in life.

2024 At a Glance

- 140 patients enrolled across 20 departments
- 11 patients received surgical limb revisions through public hospitals
- 39 water filters delivered to homes without clean drinking water
- 19 PT students trained through clinical rotations
- 28 participants added to labor inclusion database
- 130+ community contacts and peer mentors mobilized
- 100+ group and individual therapy sessions provided

Innovation & Partnerships:

In 2024, we scaled our CBR model through technology, partnerships, and people. We hired two new Mobilizers and trained our full field team in outcome measurement, human subjects research, and mindfulness. We launched MoviliApp, a smartphone-based system that guides each step of a home visit: ensuring consistency, accountability, and real-time feedback.

We also formalized our peer mentoring program, matched over 130 participants with community contacts, and deepened our collaboration with Guatemalan universities. Through these efforts, we continue to prove that community-based models are not just effective, they're essential.

CBR in the Global Spotlight

In 2024, ROMP launched a randomized-controlled trial to rigorously study the impact of the CBR Program. We're laying the foundation for global adoption of a model that redefines what's possible after limb loss.

“This experience has helped me regain my independence and rebuild my self-confidence. I have learned to value myself, to love who I am, and to recognize that I must prioritize my well-being and believe in my ability to move forward.”

— CBR Participant, Guatemala

Ecuador

311
DEVICES DELIVERED

1547
PATIENT VISITS

2024 Highlights

- Deepened local government partnerships by collaborating with six provincial governments across Ecuador’s Coastal, Highland, and Amazon regions. These partnerships enabled nine successful field deployments through mobile and satellite clinics.
- Expanded clinical infrastructure with a new workshop wing, complete with dedicated assembly and lamination areas. Painted the Mobility For All Tree, a powerful symbol where patients, volunteers, and supporters leave a fingerprint to mark their journey with ROMP.
- Delivered 52 prostheses in two days
In partnership with MrBeast, ROMP delivered 52 prosthetic devices to 48 patients during a record-breaking two-day clinic.
- Expanded patient services during volunteer clinics, including: physiotherapy and psychological care, frontline screenings for hypertension and diabetes, and tailored education on nutrition and chronic disease management. Promoted patient entrepreneurship by hosting a public fair where participants showcased and sold their products to the broader community.
- Launched “Summer in Motion,” a new community event that brought ROMP patients and local residents together for hiking in the Ecuadorian Andes, celebrating movement, inclusion, and shared resilience.

Patient Spotlight: Kelly

Originally from Bolivia, Kelly traveled six days by land to reach ROMP Ecuador after being unable to access a prosthesis through her country’s healthcare system. She stayed in Ecuador for over a month receiving rehabilitation, training, and prosthetic care. Kelly’s strength and grace captivated millions. Her story, and her dancing, were featured in MrBeast’s video spotlighting ROMP, reaching over 100 million viewers worldwide.

Watch Kelly dance with MrBeast
[I Helped 2,000 People Walk Again](#)

Mission Moment

Caitie Steele has volunteered with ROMP Ecuador four times since she was an engineering student. During her trip in July 2024, she applied knowledge from her studies in Prosthetics and Orthotics and delivered her first prostheses independently. Caitie has deeply empathized with and committed herself to ROMP Ecuador, and her work greatly supports and inspires us.

C4C (Components for a Cause)

\$997K
VALUE OF COMPONENTS
DONATED TO ROMP

In 2024, ROMP's Global Programs strengthened the foundation that powers patient care across Guatemala, Ecuador, and beyond. At the center of this work is **Components for a Cause (C4C)** our international prosthetic recycling initiative that diverts usable components from landfills and delivers them to patients in need. From our Denver-based warehouse, we managed a growing global supply chain, expanded infrastructure, and embraced new technologies to ensure that care remains efficient, high-quality, and truly sustainable.

2024 Highlights

- Expanded warehouse operations through increasing capacity by 50% and hiring a new Warehouse Associate to support growth.
- Improved inventory systems with inFlow, a cloud-based inventory platform used across the U.S., Guatemala, and Ecuador to improve traceability and planning.
- Valued our impact through full component valorization, assigning dollar value to our inventory and quantifying the economic impact of prosthetic recycling.
- Delivered a broader range of materials including Sealing-Ring Liners and Vivak plastic, enabling new fabrication techniques and enhanced patient outcomes at our clinics.
- Continued collaboration with Penta Medical Recycling, optimizing component exchanges to better serve patients across differing limb loss demographics.

Learn more about our [C4C Program](#)

Partner Spotlight: Mary Free Bed

In 2024, Mary Free Bed organized a "Limb Disassembly Day" to collect and donate a large shipment of prosthetic liners, knees, and metallic components, delivered during their volunteer trip to Guatemala. In 2025 they are doing it again, doubling down on their commitment to mobility for all.

Global Programs

Beyond components, Global Programs fueled the advancement of ROMP's clinical and research initiatives, including:

- Launched a randomized-controlled trial to study the impact of Community-Based Rehabilitation (CBR) in Guatemala.
- Developed MoviliApp, a custom mobile application to support and monitor CBR home visits.
- Created an editable version of the National Rehabilitation Services Guide (NRSRG), a first-of-its-kind resource designed to equip community health workers to identify and refer people with disabilities to rehabilitation services.
- Advocated regionally for greater investment in rehabilitation by donors and policymakers throughout Central America.
- Submitted funding proposals to dozens of institutions appealing for financial support to expand the breadth and depth of ROMP programs in the Americas.

[Browse the National Rehabilitation Services Guide \(Guatemala\)](#)

For access to the customizable NRSRG, email mande@rompglobal.org

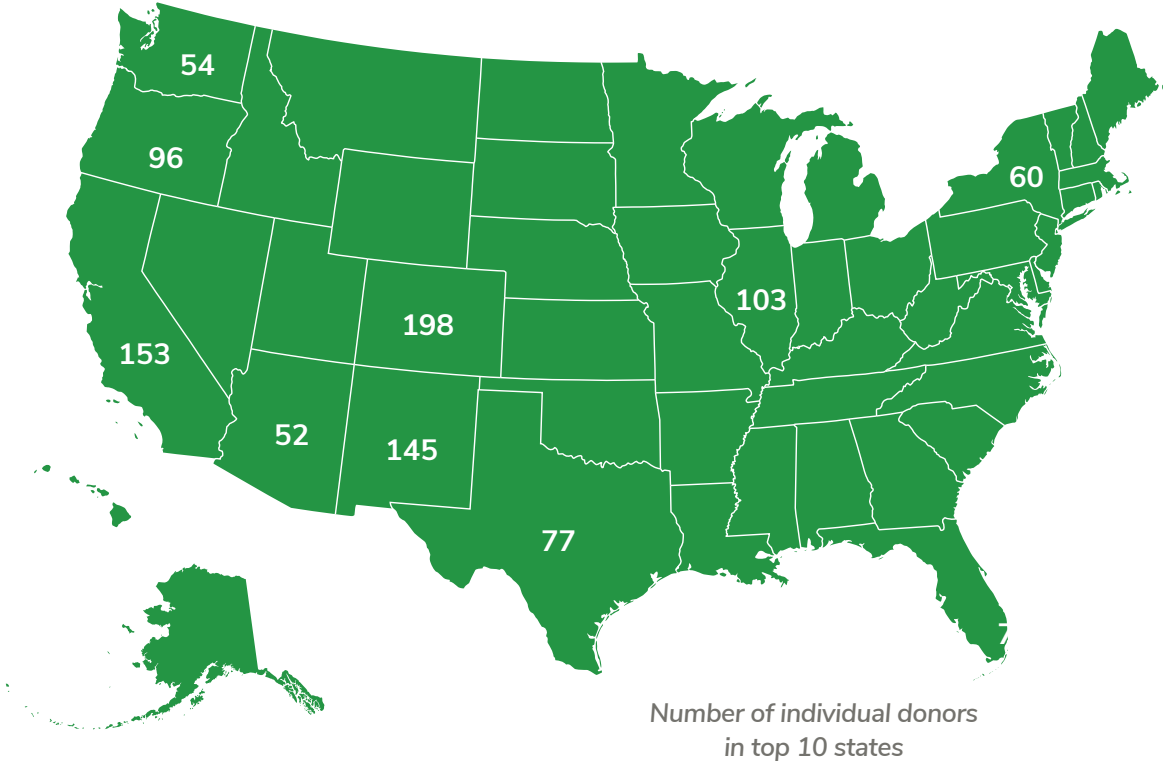

Partner Spotlight: Tawingo Fund

The Tawingo Fund helped make ROMP's CBR services possible for patients in Guatemala in 2024. Their support strengthened our ability to reach underserved communities with wraparound care that goes far beyond the prosthesis. Tawingo also funded the creation of the National Rehabilitation Services Guide for Guatemala, which is now available as a shareable and editable tool to support rehabilitation systems worldwide.

Partnerships

Equinoccial | Vitality Partnership Ecuador

In 2024, ROMP partnered with Seguros Equinoccial – Vitality to deliver prosthetic care to 14 people in Ecuador through an innovative corporate impact initiative. As part of this unique program, users of the Equinoccial Vitality wellness app can convert their healthy habits, tracked through physical activity, into digital medallions, which are then redeemed by the company as financial contributions to ROMP. This creative model links community wellness with tangible social impact, transforming exercise into mobility for those in need and reinforcing a shared commitment to inclusive, active, and dignified lives. Vitality aims to triple the impact in 2025.

Hotel Vista Quince Partnership Guatemala

In Guatemala, ROMP formed a meaningful partnership with Hotel Vista Quince to expand access to prosthetic care through a socially responsible hospitality model. For every night booked, whether individual or corporate, the hotel makes a direct donation to support ROMP's clinical services. This alliance is more than charitable giving; it's a long-term commitment to breaking down barriers for people with disabilities and improving quality of life through increased mobility. By integrating purpose into each guest stay, Hotel Vista Quince is helping ROMP to ensure access to high-quality prosthetic care to underserved individuals in Guatemala, and fostering a more inclusive future, one night at a time.

Climbing for ROMP

From One Summit to a Global Movement

Climbing for ROMP began in 2015 with a bold vision: put a group of adaptive athletes on the summit of Cayambe, the highest peak on the equator, in celebration of the 25th anniversary of the Americans with Disabilities Act. What started as a single expedition sparked a global movement, one rooted in the belief that mobility is a human right.

Over the past decade, Climbing for ROMP has grown into ROMP's largest global fundraising and awareness campaign, advocating for access to high-quality prosthetic care around the world. The movement has inspired:

- 2,500+ climbers
- 350+ climbs across 7 continents, 35 countries and 47 U.S. states
- Over \$1.1 million raised
- Delivery of 733 prostheses and services to patients in need

In 2024, the campaign reached new heights with a multi-peak expedition to Chimborazo, Cotopaxi, and Cayambe. This adventure was a tribute to 10 years of climbing for mobility and a declaration of the summits still ahead.

A Legacy of Elevation: On Mountains and On Mission

For nearly a decade, Lauren "LP" Panasewicz helped shape the Range of Motion Project into the bold, mission-driven organization that it is today. As ROMP's Director of Development and the visionary behind Climbing for ROMP, LP transformed a single expedition into a global movement by uniting hundreds of climbers in expeditions on every continent, raising over \$1M, and bringing the ROMP mission to new heights.

LP's leadership went far beyond logistics and fundraising. She was a force of creativity and conviction, blending storytelling, strategy, and heart to expand ROMP's reach across the world. From producing award-winning short films like *La Cumbre* and *Voluntariosa* to championing adaptive athletes on the summits of Cotopaxi, Chimborazo, and Cayambe, she gave voice and visibility to the global fight for mobility.

In 2024, LP led her final expedition with ROMP, celebrating the 10th Annual Climbing for ROMP

campaign. That milestone wasn't just a moment, it was a movement made possible by her unwavering commitment to equity, access, and community.

Though LP's formal role with ROMP concluded following a departmental restructuring, her legacy continues to climb with every step taken by a ROMP patient, every summit reached by a Climbing for ROMP team, and every voice raised in support of mobility for all. We are deeply grateful for LP's years of service, her leadership, and the movement she helped build.

Partner Spotlight:

Since 2020, Cotopaxi's generous support through the Cotopaxi Foundation has enabled ROMP to expand its reach, including opening a satellite clinic in the Ecuadorian Amazon and extending mobile services to rural communities in Ecuador and Guatemala. In 2024, Cotopaxi and ROMP deepened their partnership to collaborate on the 10th Annual Climbing for ROMP campaign. National Geographic Explorer and Cotopaxi Ambassador Dr. Albert Lin joined ROMP Athlete Carlos Aguinda to ascend Ecuador's Cayambe volcano. This powerful journey, documented in the three-part series *The Right to Move*, highlighted the transformative impact of prosthetic care and the shared belief that movement is an inalienable right.

In an unprecedented partnership, ROMP joined forces with global YouTube sensation MrBeast to restore mobility to 100 individuals in Ecuador and Guatemala. Beyond the ROMP collaboration, MrBeast's global project helped 2,000 walk again, mostly with prosthetic care.

Behind the Scenes

MrBeast and his team actively participated in prosthetic fittings and engaged with patients, emphasizing the human connection behind the mission.

Fun stuff that didn't make the video: ROMP organized a track race, horseback riding, and soccer games with patients. The MrBeast team and ROMP Ecuador crew enjoyed a dinner in Quito's historic old town.

Join the Movement

The success of "Beast Mode for Mobility" underscores the power of collaboration and compassion. Yet, the journey continues. With over a thousand individuals awaiting prosthetic care, your support can make a tangible difference.

Spotlight on Transformation

Sherli, a 27-year-old from Guatemala, lost her leg due to a severe infection following a traffic accident. For years, she struggled with dependence and limited opportunities. Through this initiative, Sherli received a custom prosthetic leg, enabling her to walk independently, seek employment, and pursue further education. [Watch Sherli walk again!](#)

- 100 ROMP patients received prosthetic limbs through the collaboration.
- 2,000 people around the world are walking again.
- 1,000+ patients are currently on ROMP's waiting list for prosthetic care.
- The video garnered over 100 million views, raising global awareness about mobility inequity.

[Donate or Get Involved](#)  This was the biggest prostheses delivery initiative in ROMP's 20-year history.

In Memoriam

Honoring those in the ROMP community that have passed on in 2024.

ROMP Ecuador Patients

Angela Chevez (1959 - 2024)
Angela started walking again in 2023 after receiving loving care from ROMP volunteers and staff.

Jacinto Suarez (1976 - 2024)
The ROMP team had the pleasure of meeting Jacinto during mobile clinic outreach in Santo Domingo. His radiant smile lit up the room when he stood on two feet for the first time with MrBeast and friends.

Angel Vanegas (2008 - 2024)
Angel shared his joy and energy with MrBeast and crew in October of 2024.

ROMP Guatemala Patients

Linseed Wendoly Brillith Ardon Valle (2010 - 2024)
Linseed was brave in the face of her cancer. She learned to walk again and returned to school bringing her light and kindness wherever she went.

Mynor Arreaga (1967 - 2024)
Mynor lived to the fullest and his family carries his memory in their hearts.

Elvia Leticia Baldomero (1963 - 2024)
Elvia was with the ROMP team for most of 2024 and is remembered for her positive attitude and collaborative spirit. Month after month she worked on her physical therapy and never gave up on her dream to walk again.

Adrian Roque Carrera (1954 - 2024)
Adrian was loved by his family, friends, and community.

Adonias Corado Chinchilla (1961 - 2024)
Adonias was with the ROMP family since 2019. He diligently worked on his rehabilitation and regained considerable mobility through prosthetic care.

Roberto Hernandez (1966 - 2024)
Roberto's dream of walking and working again selling pineapples came true through his disciplined rehabilitation with ROMP. He reminded us that we can set goals at any point in life.

Yostin Alfredo Orellana Tojes (2009 - 2024)
Yostin came to ROMP through a partnership with the National Pediatric Oncology hospital of Guatemala. He worked so hard for two years and learned to walk again. He always kept his head up and is deeply missed by his family and friends.

Rocky Shorey
(1981 - 2024)

“As Rocky developed his identity as a mountaineer, I can safely surmise it was a deep love for being in and with the mountains. But I believe it was his love and care for other human beings that brought him to experience the mountains with ROMP. In 2021, Rocky climbed Cotopaxi with the annual Climbing for ROMP Team. I will let Rocky speak for himself about that experience and “a big why” of why we both support ROMP.”

– Heather Shorey,
Rocky’s sister,
ROMP volunteer and climber

“What made this summit so significant for me was not that it is the tallest mountain I’ve climbed or because it is so beautiful, the most difficult, or its sheer magnitude. What made this summit so significant for me was the amazing people I had the incredible opportunity to share this experience with...I have never been so overcome with emotion as I was when I set foot on that summit—and then when I saw each team member come over the ridge and make it to the summit, I couldn’t help the tears from coming down. It really was one of the most amazing things I have witnessed. Despite disabilities, limitations, or obstacles, the human spirit can always triumph. A huge thanks to ROMP for putting together such an amazing experience. This really has changed my view of people and the world.”

– Rocky Shorey, ROMP climber
